# Company information

## Universal Field (SuZhou) Intelligent Technology CO.,LTD

Founded in November 2017, it is mainly engaged in the R & D, production and sales of RFID tags, RF tags, EAS tags and clothing washing labels, as well as the system development and integration of RFID and other electronic tags and anti-theft tags in the field of Internet of things and anti-theft. Mainly engaged in electronic tags and EAS tags, which belong to the application tags of electronic goods anti-theft (EAS) technology. RFID tag is a non-contact automatic identification technology. It can automatically identify the target object through radio frequency signal and obtain relevant data. With the rapid development of Internet of things technology, RFID system is applied in transportation, logistics, shopping malls, hospitals, libraries and other fields It has been widely used.

supplier:

# Strength

**Complete production lines**

- Bonding
- Printing
- slitting
- Converting
- Lamination
- Hot-stamping
- Die-cutting
- Inkjet
- Encoding
- Labeling
- Inspection

**Protect business**

- **Oversea**
  - USA
  - Spain
  - Japan
  - Korea
  - Bangladesh
  - India
  - Pakistan
- **Domestic**
  - Fashion
  - Retailing

**Professional team**

- Professional development team
- Professional RFID tag & RFID label production team

**Sustained investment**

- Continuous input of new equipment
- Expansion of production area
- Reserves for Professional staff

**Market trends**

- Potential for domestic demand
- The gradual recovery of overseas outbreaks
- Global Internet of Things Chip Label Demand

## RFID Tag

## EAS Tag

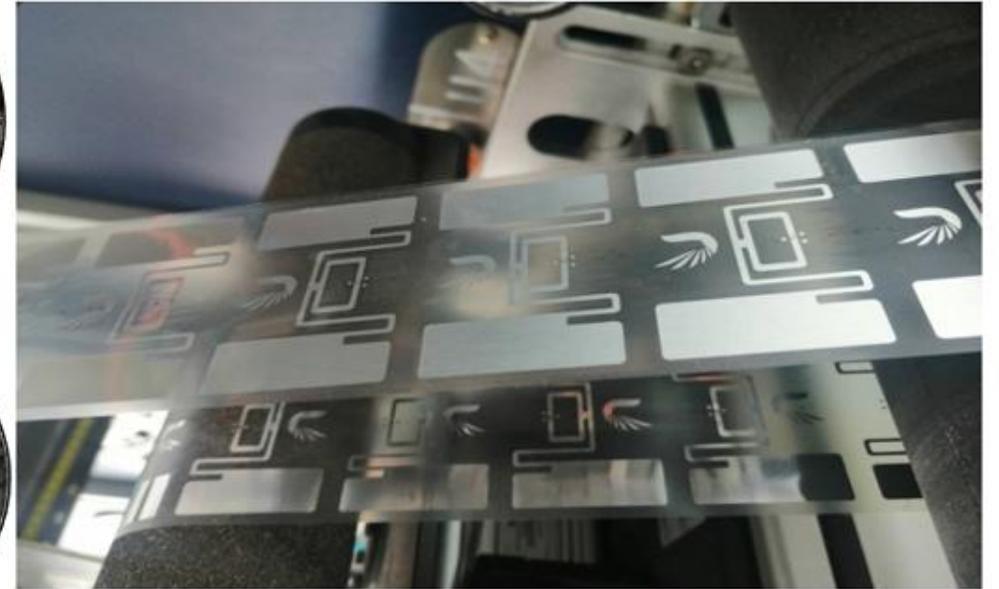

# Equipment

We have full Equipment for RFID production

04

## Bonding machine

We purchased 3 Muhlbauer bonding machine in 2020, monthly output more than 10M piece, the inlay produced not only for In-house but also for Sale.

For OEM business, our company has long cooperated with relevant well-known enterprises (Arizon, Avery, Xindeco, SY, etc.) to provide targeted antenna design services for customers;

# Converting

## Converting machines

Total 8 converting machines at our factory, machine with more work units for different liners, face materials change, also with two on line die-cutting units to match high requirement products.

Capacity can be 2M tags and 4M labels daily

# Printing

## Digital printer

The equipment supports 4-color printing, multi row printing and online slitting. The printing speed can reach 20m/min. It supports small quantity, multi size and batch printing, and the printing effect is stable.

5 units UV letter press printing machine  
4 units UV letter press printing machine  
2 units UV letter press printing machine  
Machine with Five UV printing units plus One label  
on line die-cutting unit plus One varnish unit,  
printing speed can be 10,000 Cycle per hour

## UV Inkjet & Encoding machine

- 6 Machines for tag;
- 6 Machines for labels (roll to roll)
- 2 IN 1 both for Inkjet & Encoding
- 2 IN 1 both for UHF & HF inlay
- Inspection on line

# Labeling

## Labeling for tag and fabric

- Tags labeling
  - Double working units
  - 200K piece daily output
- Fabric labeling
  - 3 label working machine
  - 600K piece daily output
